				Average Percentage	107.04

9.2 Mentoring system (5) **Total Marks 5.00**

Institute Marks : 5.00

9.2 Mentoring

ANRK has implemented a structured and formalized Mentor–Mentee System to ensure holistic development of students covering academic, personal, and career dimensions.

Mentoring is institutionalized and incorporated into the regular timetable, ensuring:

- Scheduled mentoring hours every week
- Mandatory mentor–mentee interaction
- Structured documentation
- Continuous monitoring and follow-up

Each faculty member is assigned 15–20 students and remains their mentor throughout the program duration to ensure continuity and trust-building. This continuity helps in building trust, understanding individual student needs, and providing sustained guidance. The mentoring system is designed not only to monitor academic performance but also to address personal concerns and career aspirations of students.

The institution has adopted a proactive mentoring approach, where mentors continuously track academic progress, attendance patterns, behavioral aspects, and overall student engagement. The mentoring process is documented systematically, and records are maintained for monitoring and review purposes. The mentoring system covers:

1. Academic Mentoring

- Monitoring attendance and academic performance
- Reviewing internal assessment marks
- Identifying slow and advanced learners
- Guiding students on course selection and electives

- Monitoring CO attainment-related performance

After every formative assessment, mentors analyze student performance and:

- Suggest remedial classes
- Recommend bridge courses
- Advise participation in value-added programs

2. Personal Mentoring

Mentors monitor:

- Behavioral patterns
- Emotional well-being
- Adjustment issues

Students are encouraged to discuss personal concerns in confidence. If required, the mentor provides guidance or forwards the case to higher authorities following the escalation process.

3. Career Guidance and Professional Development

Mentors guide students regarding:

- Internship opportunities
- Higher education pathways
- Competitive examinations
- Skill enhancement programs
- Industry certifications
- Value-added courses offered by the institution

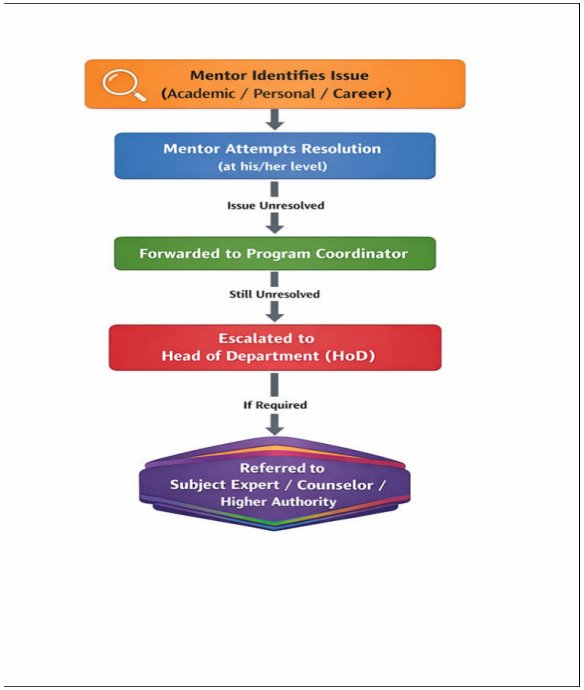

Students are encouraged to enroll in MOOCs such as: NPTEL, SWAYAM

They are also motivated to become members of professional bodies like: IEEE, CSI, ISTE

Implementation Mechanism

1. Mentor identifies issue (academic/personal/career).
2. Mentor attempts resolution at his/her level.
3. If unresolved → Forwarded to Program Coordinator.

4. If still unresolved → Escalated to Head of Department (HoD).
5. If required → Referred to Subject Expert / Counselor / Higher Authority.

Effectiveness and Continuous Improvement

The mentoring system has demonstrated measurable improvement in several institutional parameters. There has been improvement in attendance levels, academic performance, participation in co-curricular activities, enrollment in value-added courses, and placement outcomes.

Periodic review meetings are conducted at the departmental level to assess the effectiveness of the mentoring system. Feedback from students is analyzed to identify areas of improvement. Based on review outcomes, modifications are implemented in mentoring practices, documentation processes, and support mechanisms.

The incorporation of mentoring sessions into the academic timetable, structured documentation, defined escalation matrix, and integration with career guidance initiatives reflect the institution's commitment to systematic student support and continuous quality improvement

9.3 Feedback Analysis (10) — **Total Marks 10.00**

9.3.1 Feedback on Teaching and Learning Process and Corrective Measures Taken, if any (5) — Institute Marks : 5.00

9.3.1 Feedback on teaching learning

ANRK has established a systematic and transparent mechanism for collecting and analyzing student feedback on teaching effectiveness. The primary objective of this process is to enhance instructional quality, ensure accountability, and promote continuous professional development among faculty members.

Feedback on teaching is collected from students at the end of every semester. The questionnaire is carefully designed in consultation with the Program Assessment Committee (PAC) to ensure alignment with academic objectives, outcome-based education principles, and institutional quality standards. The feedback instrument is periodically reviewed and updated to maintain relevance and effectiveness.

The feedback is administered through the institutional ERP system in an online mode. Separate feedback links are generated and circulated branch-wise and year-wise to ensure organized data collection. The feedback window remains active for three consecutive days, during which students submit their responses confidentially. The controlled time frame ensures authenticity and focused participation.

Students evaluate faculty members on a five-point rating scale across various parameters related to teaching and academic engagement. The parameters typically include:

- Teaching effectiveness
- Punctuality and regularity
- Subject knowledge and content delivery
- Communication skills and clarity
- Interaction and student engagement
- Coverage of syllabus

The rating scale ranges from 1 to 5, where higher scores indicate better performance.

S.No	Parameter	Rating(Scale:1-5)
1	Does the faculty [Discusses the topic with clarity and in detail.]	
2	Does the faculty [Punctual to the class]	
3	Does the faculty [Communicates Clearly]	
4	Does the faculty [Possess deep knowledge of the subject]	
5	Does the faculty [Engages the class for the full duration and completes the topic in time.]	
6	Does the faculty [Clarifies the doubts raised.]	
7	Does the faculty [Comes to the class fully prepared]	
8	Does the faculty [Use modern teaching aids like projector, audio visuals etc.]	

Title	Description
Feedback collecting process	Feedback from all students on respective courses
Frequency of feedback collection	Once in a semester

Metrics used for calculation	5-Excellent, 4-Very Good, 3-Good, 2-Satisfactory, 1-Below average

Analysis and Review Process

After the closure of the feedback window, responses are compiled and analyzed at the departmental and institutional levels. The average score for each faculty member is computed across all parameters.

A benchmark score of 4.0 on the five-point scale has been established as the expected performance standard. Faculty members receiving an average score below 4.0 are identified for improvement measures. In such cases, a structured improvement plan is initiated.

To ensure fairness and reliability, faculty members identified for improvement are subjected to a second round of feedback in the subsequent semester to assess progress and effectiveness of corrective measures.

Corrective and Improvement Measures

The Institution adopts a supportive and developmental approach toward faculty improvement. Based on feedback analysis, corrective measures may include:

- Participation in Faculty Development Programs (FDPs)
- Pedagogical training workshops
- Counseling sessions with the Head of the Department
- Peer mentoring by senior faculty members
- Workload redistribution where necessary
- Monitoring of classroom delivery and mentoring support

These measures are designed not as punitive actions but as professional enhancement initiatives aimed at strengthening teaching quality.

Integration with Quality Assurance Mechanism

The feedback analysis and subsequent actions are reviewed at the departmental level and reported to the Institutional Quality Assurance mechanisms. The process ensures:

- Continuous monitoring of teaching standards
- Data-driven decision-making
- Faculty capacity building
- Sustained academic excellence

The structured feedback system has contributed significantly to improved teaching effectiveness, enhanced student satisfaction, and strengthened academic governance within the institution

9.3.2 Feedback on Academic Facilities (5) | Institute Marks : 5.00

9.3.2 Feedback on facilities

ANRK has a system in place to collect feedback from the internal stakeholders(students) with regard to the facilities provided in terms of laboratory facilities, library at department and institute level, e-learning facilities and other student support services for continuous improvement. In addition to that student is also provided with suggestion boxes in all the

departments at strategic locations to share their feedback.

The feedback on academic infrastructure, hostel and other facilities are obtained and the corrective actions are initiated.

Classrooms/Laboratories/ Internet facilities - The students provide feedback on any issues related to classrooms, lab equipment which are communicated to the authorities concerned and are rectified.

Enhancement of Internet Bandwidth

Feedback Received: During the academic year 2023, both students and faculty members reported frequent internet connectivity issues, slow browsing speed, interruptions during online classes, and difficulty accessing e-learning platforms and research databases. It was observed that the existing internet bandwidth of 200 Mbps was insufficient to meet the increasing demand for digital learning, online assessments, virtual meetings, and research activities.

Action Taken: Based on the consolidated feedback and after detailed deliberations in the Infrastructure and IT Committee meetings, the Institution decided to upgrade the internet infrastructure. In January 2025, the LAN-based internet connectivity was significantly enhanced from 200 Mbps to 500 Mbps.

The following measures were implemented:

- Upgradation of the main internet bandwidth to 500 Mbps.
- Strengthening of LAN-based connectivity across computer laboratories and academic blocks.
- Network optimization to ensure stable and high-speed access during peak usage hours.
- Continuous monitoring of bandwidth utilization to avoid congestion.

Improvement in Faculty Seating and Workspace Facilities

Feedback Received: Students expressed the need for better accessibility to faculty members for academic consultation, mentoring, and project guidance. They indicated that limited consultation space sometimes restricted effective interaction. Faculty members also suggested the improvement of workspace facilities to enable better preparation, research work, and student engagement.

Action Taken: Based on the feedback received from students and faculty, the Institution undertook measures to enhance faculty seating and workspace facilities. The following improvements were implemented:

- Expansion and reorganization of faculty cabin space to ensure adequate working area.
- Provision of ergonomic chairs and improved seating arrangements for faculty comfort.
- Creation of designated and easily accessible consultation areas for student–faculty interaction.
- Improved furnishing and workspace organization to facilitate academic and research activities.

Upgradation of Physical Laboratory Infrastructure

Feedback Received: Students provided feedback indicating the need for modernization of laboratory equipment to align with current syllabus requirements and industry standards. Some instruments were reported as outdated, and there were suggestions for improving laboratory safety measures and regular maintenance practices. Faculty members also recommended upgrading advanced equipment to enhance practical exposure and research activities.

Action Taken: Based on the feedback received from students and faculty, the Institution undertook a systematic upgradation of physical laboratory infrastructure. The following measures were implemented:

- Procurement of advanced and industry-relevant laboratory equipment.

- Replacement of obsolete and outdated instruments.
- Strengthening of laboratory safety measures, including improved safety signage and compliance mechanisms.
- Implementation of periodic maintenance and calibration schedules to ensure accuracy and reliability of instruments.

Installation and Strengthening of Surveillance Systems

Feedback Received: Students and faculty members expressed the need for enhanced campus safety measures to ensure a secure and disciplined learning environment. Suggestions were received regarding improved monitoring in academic blocks, laboratories, corridors, and common areas to prevent misconduct, ensure laboratory safety compliance, and strengthen overall security.

Action Taken: Based on the feedback collected from stakeholders, the Institution upgraded and strengthened the surveillance infrastructure. The following measures were implemented:

- Installation of additional CCTV cameras in academic blocks, laboratories, corridors, library, and common areas.
- Expansion of centralized monitoring systems for effective supervision.
- Periodic review and maintenance of surveillance equipment to ensure uninterrupted functioning.
- Integration of surveillance monitoring to enhance laboratory safety compliance and discipline.

Upgradation of Licensed Software and IT Infrastructure

Feedback Received: Students suggested the need for updated and industry-relevant software tools to enhance practical learning and improve employability skills. They emphasized the importance of access to modern programming platforms, simulation tools, and development environments aligned with current industry standards. Faculty members also recommended upgrading licensed software to support advanced teaching, project work, and research activities.

Action Taken: Based on the feedback received from students and faculty, the Institution initiated the upgradation of licensed software and IT infrastructure. The following measures were implemented:

- Procurement and installation of updated versions of licensed software across departments.
- Installation of domain-specific simulation, modeling, and design tools relevant to various programs.
- Provision of access to modern programming platforms and integrated development environments (IDEs).
- Regular updating of operating systems, antivirus software, and security patches to maintain system security and performance.
- Strengthening of IT support services to ensure smooth functioning of software resources.

Enhancement of Washroom and Sanitation Facilities

Feedback Received: Students provided feedback regarding the need for improvement in sanitation facilities, including better maintenance of washrooms, consistent water supply, and enhanced cleanliness standards. Faculty members also emphasized the importance of maintaining hygienic conditions to ensure a healthy campus environment.

Action Taken: Based on the feedback received from students and faculty, the Institution undertook several corrective measures to enhance sanitation facilities. The following actions were implemented:

- Renovation and repair of washrooms across academic blocks.

- Improvement of water supply systems to ensure uninterrupted availability.
- Implementation of structured and regular housekeeping schedules.
- Strengthening of cleanliness monitoring mechanisms through periodic inspections.
- Provision of necessary sanitation materials to maintain hygiene standards.

Additional Improvements Based on Student Feedback

Feedback Received: Students suggested the need for enhanced learning and support facilities, including increased library seating capacity during peak hours, improved access to digital resources, better drinking water facilities, upgraded classroom teaching aids, improved common interaction spaces, and uninterrupted power supply during academic activities. Faculty members also supported the need for strengthened infrastructure to ensure smooth conduct of teaching–learning processes.

Action Taken: Based on the feedback received from students and faculty, the Institution implemented the following measures:

- Expansion of library seating capacity to accommodate more students.
- Installation of additional digital access terminals to facilitate access to e-resources and research databases.
- Improvement of drinking water facilities through installation of water purification systems.
- Upgradation of classroom infrastructure with smart boards and LCD projectors to support ICT-enabled teaching.
- Enhancement of common areas and student interaction spaces to promote collaborative learning.
- Strengthening of power backup facilities to ensure uninterrupted academic and laboratory activities.

9.4 Training and Placement Support (10)

Total Marks 10.00

Institute Marks : 10.00

Career guidance program for higher studies and placements:

Career Guidance:

ANRK offers career guidance and placement on all aspects of career planning, job searching and post-graduate studies. College provides individual counseling for all the students towards reaching goals.

The institution has a very active career guidance committee which is part of the training and placement cell. The students are given comprehensive training in aptitude, group discussion and interview skills that help them in securing placements.

Training and Placement Cell:

The devoted Training and Placement Cell of Anurag Engineering College is ever extremely enthusiastic in sorting out the profiles of students, keenly inclined in bringing out the corporate close to access to the eventual engineers through campus recruitment drive and bearing in mind the exact requirement of the companies to train the students of all angles of employability and drill them aptly with enough exposure indeed paying individual attention subject wise and sure enhancing their proverbial wisdom in all dimensions. Concomitantly academic program completion and concurrent competency in employability being the obelisks in accomplishing the successful career and entering into the apt job market to fulfill their dream job of the yearning engineers to earn lucratively. It is headed by Vidya sagar, Training and Placement Incharge. They are supported by staff members and student coordinators from each department.

The institute has training and placement Cell operating centrally to take care of the activities related to career counseling, training on employability skills, guidance for higher education, internships and placements.

The following is the constitution of the committee

S.No	Name	position	Department
1	Ch.Vidya Sagar	Training & Placement Officer	CSE
2	N venkateswarlu	Assistant Training & Placement Officer	ECE
3	Y Sandeep	Member	CIVIL
4	S Yasoda Krishna	Member	EEE
5	A suresh	Member	MECH
6	V David	Member	ECE
7	J.Vijaya Sree	Member	CSE
8	D Venkanna	Member	MBA
9	S Udaya Kumar	Member	Polytechnic

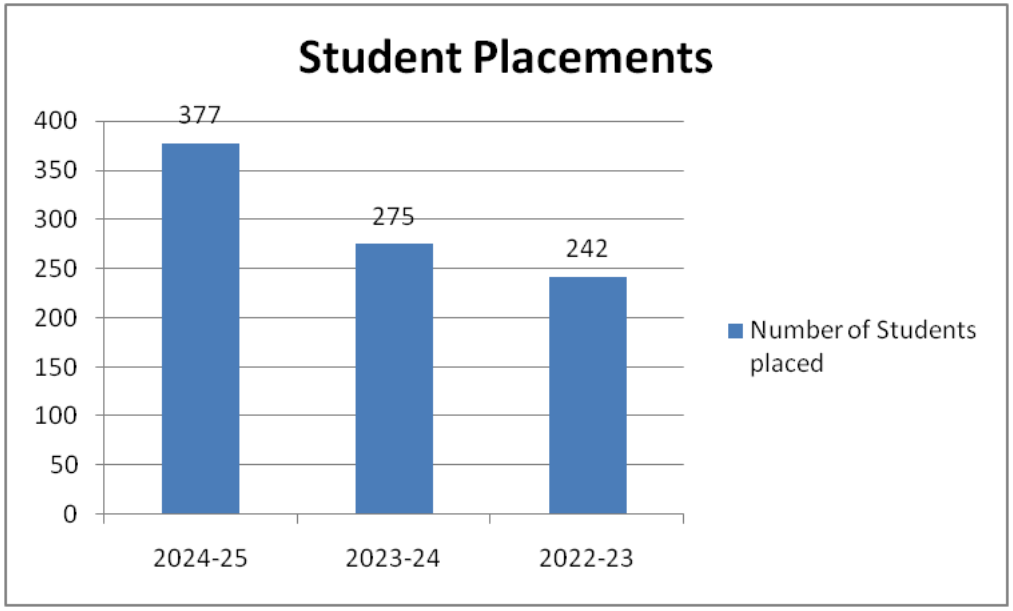

Objectives of the Committee:

1. Guidance for competitive & civil service examinations
2. Career Counselling
3. Exchange of Technology
4. Giving suggestions to students to further studies through TOEFL, GRE, M. Tech, MS etc.
5. Training in spoken English, Skill Development and arranging different tests and modelexams.
6. Arranging guest lectures on different events
7. IT / Management seminars and group discussions
8. Projects tie-up so for Engg. / MBA etc. for minor / major projects
9. Material supplies to each student for their future plans for different courses and how toappear
10. Technology transformation based on exhibitions and seminars
11. Recent trends and further actions
12. Information supply to different students w ith printed material and guidance

Placement Details:

The placement performance of Anurag Engineering College(ANRK) over the academic years is presented in the form of a chart, illustrating the number of students successfully placed each year. This graphical representation provides a clear and concise view of placement trends, highlighting the institution's consistent efforts toward enhancing student employability. It reflects the effectiveness of training programs, industry collaborations, and career guidance initiatives undertaken by the college. The chart also helps in analyzing year-wise growth, identifying patterns, and demonstrating the overall progress in placements, thereby showcasing the institution's commitment to academic excellence and professional success of its students.

Student placement Academic year-wise

Pre-placement Training:

The third year students are trained under soft skills such as creativity, Analytical thinking, Emotional Intelligence, Interpersonal communication skills, Judgment, decision making and leadership skills and, the students are trained under Aptitude which includes Numerical Reasoning, logical and verbal ability, technical proficiency training will provide to enhance the skills on Programming languages such as C, C++, Python, Java,IOT ,FSD and Artificial Intelligence based programs.Pre-Assessment will be conducted to analyze the strength and weakness of the students.

MOUs

ANRK signed Memorandum of Understanding (MOU) with several industries to establish official partnerships to bridge the gap between the academy and industry needs and thereby develop employability skills of the students.

Anurag Institution conducts training programs through MOUs with TASK, Elbert training offers skill programs, training program to provide awareness on trends and technology to enhance the employability skills

S.No	Name of the Company	Year of Signing MOU	Duration
1	TASK	08.09.2025	1 Year
2	Micro Link Information Technologies	05.06.2022	1 Year

3	Protective Technologies Pvt LTD	05.06.2022	1 Year
4	AMTZ	16.02.2026	1 Year
5	NIJA Manpower Services	07.02.2026	1 Year
6	Softech Talent Nexus PVT LTD	11.01.2026	1 Year
7	SOHAM Academy	15.02.2024	1 Year
8	KITSCART Innovations	10.07.2019	1 Year
9	INDP PVT LTD	14.06.2023	1 Year
10	Elbert Technologies	16.01.2025	1 Year
11	Vector India PVT LTD	08.01.2025	1 year

9.5 Start-up and Entrepreneurship Activities (5) — **Total Marks 5.00**

Institute Marks : 5.00

ANRK has established a structured ecosystem to promote innovation, entrepreneurship, incubation, and start-up culture among students. Recognizing its role as a rural engineering college, the institution emphasizes technology-driven solutions addressing local, regional, and societal challenges. The entrepreneurship ecosystem is designed to nurture ideation, prototype development, business modeling, and startup incubation through systematic mentoring and infrastructure support.

The initiative aligns with national priorities on innovation, skill development, and self-reliance, while contributing to employment generation and rural economic development.

Institutional Initiatives for Promoting Entrepreneurship

The Institution has undertaken multiple initiatives to create awareness and provide practical exposure to entrepreneurship.

Entrepreneurship awareness programs are conducted regularly to sensitize students about startup opportunities, funding mechanisms, intellectual property rights, and government schemes. These programs include guest lectures by entrepreneurs, industry experts, and startup founders.

Innovation and ideation workshops are organized to train students in design thinking, problem identification, prototype development, and business model canvas preparation. Hackathons and idea competitions are conducted at department and institutional levels to encourage creative problem-solving.

Faculty members act as mentors to guide students in converting technical ideas into viable business models. Students are encouraged to work on projects that have commercialization potential, especially solutions relevant to rural communities such as renewable energy applications, water management systems, agricultural automation, and low-cost engineering solutions

Facilities Created to Support Innovation and Startups

To strengthen the entrepreneurial ecosystem, the following facilities and support mechanisms have been established:

An Innovation and Entrepreneurship Development Cell (IEDC) functions as the nodal body to coordinate startup-related activities. The cell facilitates idea screening, mentoring support, and interaction with external agencies.

A dedicated incubation space has been created with basic infrastructure including internet connectivity, computing facilities, prototype development support, and meeting space. Students with innovative ideas are allowed to utilize these facilities for product development and business planning.

Well-equipped laboratories and workshops are made accessible beyond regular academic hours to support prototype fabrication and testing. Software tools and upgraded technical platforms are provided to assist product design and simulation activities.

The institution also provides guidance on intellectual property filing, startup registration, and funding proposal preparation. Students are encouraged to apply for government-sponsored innovation schemes and startup grants.

The startup promotion process follows a structured approach:

Initially, students submit innovative ideas during project reviews, hackathons, or innovation drives. The ideas are evaluated by a screening committee comprising senior faculty members and subject experts.

Selected ideas undergo mentoring sessions focusing on technical feasibility, market viability, and financial planning. Students are guided in developing prototypes and minimum viable products (MVPs).

Promising projects are recommended for incubation support. Continuous monitoring and mentoring are provided until the project reaches commercialization readiness or startup registration stage.

Periodic review meetings assess progress and provide strategic guidance for scaling

Effectiveness of the Initiatives

Accreditation bodies expect **measurable outcomes**, such as:

- Number of startups created
- Number of prototypes developed
- Students trained
- Patents filed
- Funding received
- Projects incubated

Beneficiaries

During the last three academic years, approximately **180–220 students** have directly benefited from entrepreneurship awareness programs, innovation workshops, hackathons, and mentoring activities conducted by the institution. Students from departments including ECE, CSE actively participated in these initiatives.

Acaademic Year	Activity	Beneficiaries
2025-26	Entrepreneurship Awareness Program	80 students
2024–25	Innovation Workshop	65 students
2023–24	Hackathon	50 students

9.6 Governance and Transparency (25)

Total Marks 25.00

9.6.1 Availability of the Institutional Strategic Plan and its Effective Implementation and Monitoring (10)

Institute Marks : 10.00

ANRK has a well-defined Institutional Strategic Plan / Institutional Development Plan (IDP) aligned with its Vision and Mission. The Strategic Plan outlines the roadmap for academic excellence, research enhancement, infrastructure development, industry collaboration, entrepreneurship promotion, digital governance, and quality assurance.

The Strategic Plan is prepared for a defined period (e.g., 5 years) with measurable objectives and Key Performance Indicators (KPIs).

Major Strategic Areas

- Strengthening Outcome-Based Education (OBE) implementation
- Enhancing research publications and funded projects
- Promoting innovation, startups, and incubation activities
- Improving placement performance and skill development
- Infrastructure modernization and ICT integration
- Strengthening governance and digital administration through ERP

Approval of Strategic Plan

The Institutional Strategic Plan was prepared through a participatory approach involving:

- Principal
- Heads of Departments
- IQAC Coordinator
- Senior faculty members
- Governing Body representatives

The draft Strategic Plan was reviewed in Academic Council meetings and subsequently approved by the Governing Body (Competent Authority). The approval is documented in official meeting minutes

Implementation Mechanism

The Strategic Plan is implemented through:

1. **Department-wise Annual Action Plans** aligned with strategic goals
2. **Budget Allocation** for academic, research, and infrastructure activities
3. **ERP-based Monitoring** of academic and administrative processes
4. **Periodic Review Meetings** at department and institutional levels
5. **IQAC Monitoring and Academic Audits**

9.6.2 Governing Body, Administrative Setup, Functions of Various Bodies, Service Rules, Recruitment procedures and Promotion Policies (10)

Institute Marks : 10.00

In order to have an effective administrative setup 42 committees are formulated. An effective policy document is in place to ensure effective implementation. Each committee shall meet atleast once in a semester and the minutes of the meeting are drafted and placed in the institute website for transparancy. (https://anurag.ac.in/committees/)

Governing Body

The Governing Body is the apex decision-making authority of the institution. It provides policy direction, strategic guidance, and financial oversight.

Composition

- Chairman (Management Representative)
- Principal
- University Nominee
- Industry Representative
- Senior Faculty Members
- External Experts

Functions

- Approving Institutional Strategic Plan
- Sanctioning budgets
- Reviewing academic and administrative performance
- Approving new programs and infrastructure development
- Ensuring regulatory compliance

Administrative Setup

The administrative structure ensures smooth functioning of academic and non-academic activities.

Key Administrative Positions

- Principal – Chief Academic and Administrative Head
- Vice Principal (if applicable)
- Heads of Departments
- IQAC Coordinator
- Controller of Examinations
- Administrative Officer
- Accounts Officer

Functions of Various Bodies

Academic Council

- Reviews academic policies
- Approves curriculum-related initiatives
- Monitors OBE implementation

IQAC (Internal Quality Assurance Cell)

- Ensures quality benchmarks
- Conducts academic audits
- Monitors performance indicators

Examination Cell

- Conducts internal assessments
- Publishes results
- Maintains examination records

Entrepreneurship / Innovation Cell

- Promotes startups and innovation
- Conducts awareness programs and mentoring

Finance Committee

- Reviews budget allocation
- Monitors financial planning and expenditure

Service Rules

The institution follows clearly defined service rules covering:

- Appointment norms
- Roles and responsibilities
- Code of conduct
- Leave policies
- Performance appraisal systems

Service rules are documented and communicated to all staff members

Recruitment Procedures

Recruitment is conducted in a transparent and merit-based manner:

1. Advertisement of vacancies
2. Scrutiny of applications
3. Interview by a selection committee
4. Verification of qualifications as per AICTE/University norms
5. Approval by Governing Body

9.6.3 Transparency (5)

Institute Marks : 5.00

ANRK ensures transparency in academic, administrative, and financial processes through digital governance and structured mechanisms. All the required information regarding, policies, rules, process, Agenda & minutes of governing body, academic council are uploaded in the institute website and a copy s also submitted to the affiliating university for transparancy.

ERP-Based Transparency

An Enterprise Resource Planning (ERP) system is implemented to ensure centralized digital management of institutional activities.

Key ERP Functions

- **Admissions Management:** Maintains complete student admission records
- **Student Information System:** Stores attendance, internal marks, academic progress
- **Backlog Tracking:** Semester-wise backlog and supplementary monitoring
- **Examination Management:** Exam scheduling, results, report generation
- **Fee & Accounts Management:** Tracks fee payments, reimbursement details, scholarships
- **Faculty & HR Management:** Staff records, payroll, leave management
- **Library & Inventory:** Asset and resource tracking

The ERP enables real-time monitoring, reduces manual errors, and ensures data accuracy and accountability.

Academic Transparency

- Internal marks are displayed through ERP
- Attendance records are accessible to students
- Grievance redressal mechanism is available
- Examination results are systematically published

Financial Transparency

- Fee records are digitally maintained
- Scholarship and reimbursement tracking is automated
- Financial reports are generated periodically
- Budget approvals are documented through Governing Body meetings
- Audited Financial Statements are placed in the Institute Website

Grievance Redressal Mechanism

The institution has established committees for:

- Student grievances
- Faculty grievances
- Anti-ragging
- Internal complaints

All complaints are recorded, reviewed, and resolved systematically

9.7 Budget Allocation, Utilization, and Public Accounting at Institute Level (12) — **Total Marks 12.00**

9.9 Quality of Learning Resources (Hard/Soft) (5) — **Total Marks 5.00**

Institute Marks : 5.00

1.IEEE :

At ANRK, the IEEE student chapter provides students with opportunities to engage with the latest technological advancements and research. Through IEEE, students access the IEEE Xplore Digital Library for research papers, journals, and conference proceedings, which helps them in projects, seminars, and technical competitions.

The IEEE chapter also organizes workshops, technical events, and training sessions to develop skills in electronics, computer science, and related fields. By following IEEE standards and research, students enhance the quality of their academic and technical work, stay updated with global technological trends, and gain exposure to professional development opportunities.

IEEE at Anurag Engineering College serves as a platform for learning, innovation, and research excellence**,** bridging academic knowledge with industry practices.

2.NPTEL Local Chapter:

The Institution has an NPTEL Local Chapter that serves as a bridge between the students and the National Programme on Technology Enhanced Learning (NPTEL) offered by IITs and IISc. The chapter enables students to access high-quality online courses, complete assignments, and earn certificates recognized by premier institutions.

A faculty member acts as the Single Point of Contact (SPOC) to coordinate course registrations, mentor students, and organize awareness sessions and workshops. Through this chapter, students can enhance their technical knowledge beyond the regular curriculum, gain valuable certifications, and improve employability and career prospects.

NPTEL Local Chapter at Anurag Engineering College promotes self-paced learning, academic excellence, and professional development, providing students with opportunities to learn from top educators in India.

3.Courseara:

At our College, Coursera is used to enhance learning, improve student employability, upskill faculty, and offer flexible online programs, all while integrating smoothly into the campus system.

Learning Opportunities**:** Students and faculty can access courses, specializations, and certificates in engineering, technology, management, and other fields.

Flexible Learning**:** Courses can be taken online at any time, supplementing classroom lectures and projects.

·Skill & Career Development**:** Helps students gain industry-relevant skills and certificates to improve employability.

Faculty & Staff Upskilling**:** Faculty and staff can enhance knowledge in emerging technologies and professional skills.

Campus Integration**:** Through Coursera for Campus, the college can track progress and integrate courses with its learning system.

4.Digital Classrooms:

At ANRK, digital classrooms are designed to make learning more interactive, engaging, and technology-driven. They combine modern tools and online resources to enhance both teaching and student learning

Digital Classrooms at Anurag Engineering College:

- Interactive Learning**:** Smart boards, projectors, and audio systems make lectures engaging and easy to understand.
- Online Platforms**:** Students can access study materials, assignments, and tests through the college's digital learning management system (LMS).
- Remote & Collaborative Tools**:** Video conferencing and cloud-based platforms support online classes, guest lectures, and team projects.
- Digital Assessments**:** Quizzes and assignments are conducted online with instant feedback to track student performance effectively.
- Benefits**:** Supports interactive and self-paced learning, provides access to global resources, and prepares students for modern digital workplaces.

5.Swayam prabha:

SWAYAM Prabha is a government educational DTH platform that provides free, high-quality video lectures from leading institutions. At Anurag Engineering College, it supports classroom learning, helps students strengthen subject knowledge, and assists in competitive exam preparation through expert-delivered content.

At ANRK**,** SWAYAM Prabha can be used to:

- Access Expert Lectures: Students can watch subject-related video lectures delivered by professors from premier institutions like IITs and central universities.
- Supplement Classroom Teaching**:** Faculty can recommend specific SWAYAM Prabha sessions to strengthen core concepts.
- Support Self-Learning**:** Students can learn at their own pace beyond regular class hours.
- Enhance Exam Preparation: Useful for GATE, competitive exams, and advanced subject understanding.

6.**IETE**

At ANRK, the Institution of Electronics and Telecommunication Engineers student chapter provides students with valuable exposure to core areas of electronics, communication, and emerging technologies. Through IETE, students gain access to technical journals, newsletters, and learning resources that support their academic and research activities. The chapter regularly organizes workshops, seminars, technical quizzes, and guest lectures by industry experts, enabling students to enhance their practical knowledge and stay updated with current industry trends. Participation in IETE activities also encourages innovation, project development, and preparation for competitive examinations in the field of electronics and communication engineering

S.No	Facility	Description
1	Digital Library	2000+ CD's and computers with journal links
2	E-learning resources	NPTEL, e-books, Intranet server

3	Central computer centre	60 computers with internet and intranet facilities
4	Wi-Fi Facility	All buildings are provided with Wi-Fi Facility
5	Department laboratories	Computers with internet and intranet facilities, Usage of Software and hardware facilities.
6	Events encouraging selflearning	Seminar, Workshop, Conferences, Guest lectures, Career guidance, Industrial tours, Associations Activity, ISTE, IETE, IEEE, Industrial Visit

Benefits for Students:

- Free and high-quality educational content
- Curriculum-based learning support
- Flexible access through TV and online platforms
- Exposure to national-level academic expertise

9.10 E-Governance (5) **Total Marks 5.00**

Institute Marks : 5.00

ANRK has implemented several **e-governance initiatives and digital infrastructure** to support academic administration, teaching–learning processes, and professional activities of students and faculty. These systems improve transparency, efficiency, and accessibility of institutional services.

1. E-Governance in Academic and Administrative Processes

The institution utilizes digital platforms to manage academic and administrative activities efficiently.

- **Attendance Tracking:** Automated online systems allow faculty to record daily student attendance in real time, enabling monitoring of student regularity and generating reports when required.
- **Marks & Performance Monitoring:** Internal assessment marks, sessional examinations, and laboratory evaluations are uploaded through the digital platform, enabling systematic monitoring of student performance and attainment of Course Outcomes (COs) and Program Outcomes (POs).
- **Academic Documentation:** Classroom and laboratory activities are digitally documented through records, reports, and supporting evidence, ensuring transparency and systematic academic monitoring.
- **Governance & Reporting:** The system facilitates generation of academic reports required for institutional review, accreditation, and quality assurance processes.

2. Sustainable Practices in Academic and Learning Management

The institution promotes **paperless administration and digital learning practices** through online submission of assignments, digital circulation of notices, and electronic record keeping. Learning resources are shared through digital platforms and Learning Management Systems (LMS), which reduces paper usage and improves accessibility of learning materials.

3. Campus-Wide Computing Resources

The institution provides adequate computing infrastructure to support academic activities, including computer laboratories with internet connectivity, campus networking facilities, and licensed software tools required for teaching, learning, and research activities.

4. Accessibility and Availability

Digital resources and computing facilities are accessible to students and faculty during working hours for academic activities such as programming practice, project development, online learning, and research. Faculty members also utilize these facilities for course preparation, evaluation, and academic administration.

9.11 Initiatives and Implementation of Sustainable Development Goals (SDGs) (10)

Total Marks 10.00

Institute Marks : 10.00

ANRK recognizes its responsibility toward contributing to sustainable and inclusive development. The institutional policies, academic practices, research initiatives, and community engagement programs are aligned with selected Sustainable Development Goals (SDGs) adopted by the United Nations.

1. SDG Awareness and Integration

Curriculum includes topics like Artificial Intelligence, Data Analytics, IoT for sustainable applications

2. Key Initiatives

In Academics, introduction of courses on Artificial Intelligence, Machine Learning, Internet of Things (IoT) are included

In Mini and major projects aligned with SDGs such as:

- Smart irrigation systems
- AI-based disease detection in crops
- Waste management systems

In Research and Innovation

Participation in:

- Hackathons
- Innovation challenges focusing on real-world problems

3. Student Participation

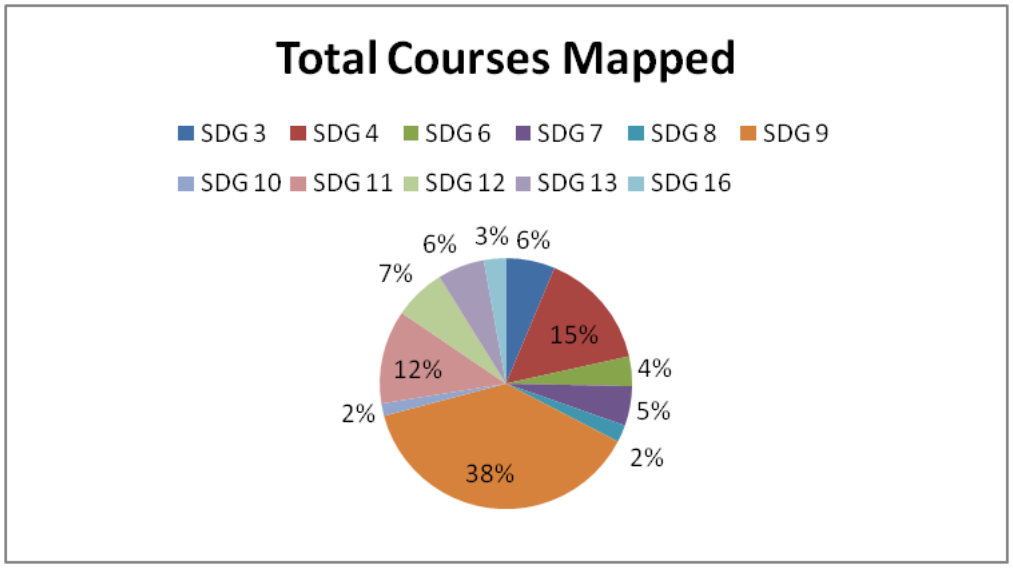

- Students actively participate in SDG-based hackathons, Project exhibitions

4.Outcomes and Impact

- Development of innovative solutions for agriculture and smart cities
- Increased student awareness of sustainability

This integrated approach of curriculum, projects, and internships enables students to develop both technical competence and social responsibility, resulting in innovative, sustainable solutions with measurable societal impact. The department maintains proper documentation such as project reports, internship records, and course outcomes to demonstrate its contribution towards achieving SDGs.

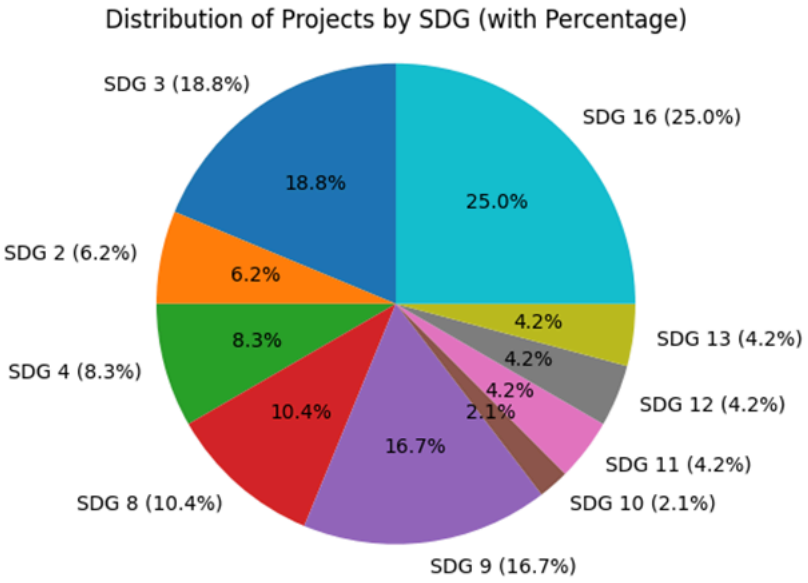

Courses mapped with SDG's

Projects mapped with SDGs:

Total Number of Projects during academic year 2024-25 are 48

Graph Representing Projects Mapped with SDGs in Percentages:

9.12 Innovative Educational Initiatives and Implementation (5)	Total Marks 5.00
	Institute Marks : 5.00

ANRK continuously adopts innovative educational practices to enhance student learning, improve outcome attainment, and address the evolving needs of industry and society. As a rural engineering college, special emphasis is placed on experiential learning, technology-enabled education, and socially relevant innovation. The initiatives are designed in alignment with Outcome-Based Education (OBE), institutional vision, and stakeholder expectations.

These innovations are systematically planned, implemented, monitored, and reviewed to ensure measurable academic impact.

Strategic Objectives of Educational Innovation

The primary objectives of implementing innovative educational initiatives are:

- To enhance student engagement and active learning
- To improve attainment of Course Outcomes (COs) and Program Outcomes (POs)
- To bridge the gap between curriculum and industry requirements
- To strengthen practical exposure and problem-solving skills
- To promote interdisciplinary and community-oriented learning

Experiential and Project-Based Learning

The Institution has implemented structured project-based learning across all programs. Mini-projects, design-based assignments, and real-time problem-solving activities are integrated into regular courses. Students are encouraged to work on locally relevant problems, particularly addressing rural development challenges.

Final-year projects are aligned with industry needs, societal problems, sustainable development goals, and emerging technologies.

Integration of ICT and Digital Learning Tools

To enhance teaching effectiveness, the Institution has integrated ICT-enabled learning mechanisms such as:

- Smart classrooms with digital boards and projectors
- Learning Management System (LMS) support
- Online assignments and quizzes through ERP
- Access to e-resources and digital libraries
- Use of simulation software and virtual labs

Faculty members adopt blended learning approaches, combining conventional classroom teaching with digital tools.

Outcome-Based Education (OBE) Implementation

The Institution has fully implemented Outcome-Based Education practices. Course Outcomes (COs) are clearly defined and mapped with Program Outcomes (POs) and Program Specific Outcomes (PSOs). CO attainment is calculated using direct and indirect assessment tools.

Corrective actions are taken whenever attainment levels fall below the benchmark. This structured approach ensures continuous academic improvement.

Industry-Integrated Learning

Industry interaction is strengthened through:

- Guest lectures by industry experts
- Industrial visits and internships
- Value-added certification courses
- Industry-sponsored projects
- Skill development programs

Students are trained in industry-relevant tools and software to enhance employability.

Skill Development and Add-on Programs

The Institution conducts add-on courses and skill-based training beyond the prescribed curriculum. These include emerging areas such as AI/ML, IoT, data analytics, renewable energy systems, and software development tools.

Special training programs are conducted to improve communication skills, aptitude, and placement readiness.

Innovation and Entrepreneurship Development

An innovation ecosystem is promoted through:

- Student project exhibitions
- Technical clubs and hackathons
- Entrepreneurship awareness programs
- Incubation support and mentoring
- Participation in national innovation competitions

Students are encouraged to convert project ideas into prototypes and startup ventures.

Community and Rural-Oriented Learning

Being a rural engineering institution, special initiatives focus on community-based learning. Students undertake field visits, surveys, and technical interventions in nearby villages. Projects related to water management, renewable energy, sanitation improvement, and digital literacy are encouraged.

This approach enhances social responsibility and real-world engineering exposure.

Implementation Mechanism

The implementation of innovative initiatives follows a structured mechanism:

1. Identification of need through stakeholder feedback
2. Planning at Department level
3. Approval by Academic and Institutional authorities
4. Faculty orientation and training
5. Execution in classrooms and laboratories

6. Monitoring through academic audits and feedback
7. Review and refinement through IQAC and academic committees

Each initiative is documented with defined objectives, execution plan, and measurable outcomes.

Monitoring and Evaluation

The effectiveness of innovative educational initiatives is evaluated through:

- CO and PO attainment analysis
- Student feedback on teaching-learning processes
- Academic performance trends
- Placement statistics
- Research and project outcomes
- Participation in competitions and certifications
- Continuous review ensures sustainability and impact enhancement.

Impact of Educational Innovations

The implementation of innovative educational initiatives has resulted in:

- Improved student engagement and attendance
- Better academic performance
- Increased industry internships and placements
- Enhanced research and project quality
- Improved stakeholder satisfaction
- Development of socially responsible engineers

9.13 Faculty Performance Appraisal and Development System (FPADS (10) | **Total Marks 10.00**

Institute Marks : 10.00

ANRK has established a structured and transparent Faculty Performance Appraisal and Development System to ensure academic excellence, accountability, and continuous professional growth. The system is designed to evaluate faculty performance holistically across teaching, research, institutional contribution, and professional development domains. The appraisal mechanism aligns with the institutional vision of delivering quality technical education and fostering innovation, particularly in the rural context.

The appraisal process is conducted annually and serves both evaluative and developmental purposes. It emphasizes improvement, recognition, and capacity building rather than punitive assessment.

Performance Appraisal Framework

The faculty appraisal system follows a multi-dimensional evaluation model. Faculty members submit a self-appraisal report at the end of each academic year. The report captures performance across the following broad domains:

- Teaching and Learning Activities
- Research and Publication
- Institutional and Department Responsibilities

The appraisal form is structured to quantify contributions and document achievements with evidence. The self-appraisal is reviewed by the Head of the Department, followed by scrutiny at the institutional level.

Teaching performance includes course delivery effectiveness, student feedback scores, innovation in pedagogy, use of ICT tools, and contribution to curriculum development. Research performance is assessed based on publications, funded projects, consultancy activities, patents, and participation in conferences.

Institutional contributions such as committee memberships, event coordination, accreditation support, and community engagement are also considered in the overall evaluation. Sample form is given below

Integration with Student Feedback

Student feedback on teaching forms an important component of the appraisal system. Faculty members receiving average ratings below the institutional benchmark are identified for structured improvement measures. Follow-up reviews are conducted to assess progress after corrective interventions.

This integration ensures that student perspectives directly contribute to quality enhancement and faculty development.

Review and Approval Process

The appraisal reports are evaluated in a hierarchical manner to ensure transparency and fairness. The review process typically involves:

1. Self-appraisal submission by faculty member
2. Review and remarks by Head of the Department
3. Consolidation and verification by institutional Head
4. Final approval by the Principal / Management

Constructive feedback is provided to faculty members based on evaluation outcomes. Strengths and areas for improvement are clearly communicated.

The **metrics for the appraisal system** can be briefly summarized as follows:

1. **Academic Performance:**
   Evaluation is based on courses handled, number of classes conducted, and student result percentage, reflecting teaching effectiveness.
2. **Research Output:**
   Includes publications in indexed journals (Scopus/WoS), conference papers, book chapters, and patents, measuring research contribution.
3. **Faculty Development:**
   Participation in FDPs and NPTEL courses indicates continuous learning and professional growth.
4. **Institutional Contribution:**
   Faculty involvement in departmental and institutional development activities for future growth.
5. **Self-Assessment:**
   Reflection on strengths, weaknesses, and plans for career improvement over the next three years.
6. **Administrative Evaluation:**
   HoD comments and final approval by the Principal complete the performance assessment.

Faculty Development Initiatives

The Institution strongly emphasizes professional growth and capacity building. Based on appraisal outcomes and identified training needs, the following development initiatives are implemented:

- Faculty Development Programs (FDPs)
- Online certification courses and MOOCs
- Workshops on innovative pedagogy and outcome-based education
- Research methodology training programs
- Support for higher studies and doctoral research
- Participation in conferences and seminars
- Financial assistance for publications and research activities

Faculty members are encouraged to enroll in certification programs and MOOCs to upgrade their technical and pedagogical competencies.

Corrective and Improvement Mechanism

In cases where performance is found below expectations, a structured improvement plan is initiated. This may include:

- Academic counseling by senior faculty or HoD
- Assignment of peer mentoring support
- Pedagogical training programs
- Workload rationalization where required
- Monitoring of classroom teaching performance

Recognition and Incentives

The Institution recognizes and rewards outstanding performance to motivate faculty members. Incentive mechanisms include:

- Appreciation certificates
- Research incentives
- Financial rewards for publications and funded projects
- Recognition during institutional events

Such measures encourage excellence in teaching, research, and institutional contribution.

Continuous Improvement and Governance

The Faculty Performance Appraisal and Development System is periodically reviewed to ensure alignment with evolving academic standards and accreditation requirements. Feedback from faculty members is considered to refine appraisal parameters and evaluation processes.

Through this structured appraisal and development mechanism, the Institution ensures that faculty members remain academically competent, professionally motivated, and aligned with institutional goals.

9.14 Outreach Activities (5)

Total Marks 5.00

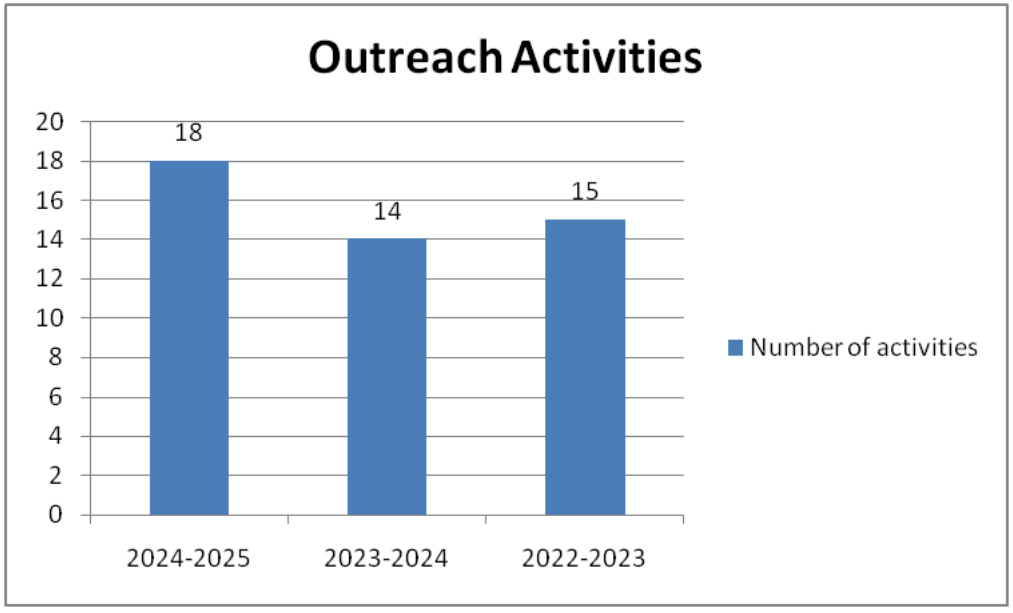

Institute Marks : 5.00

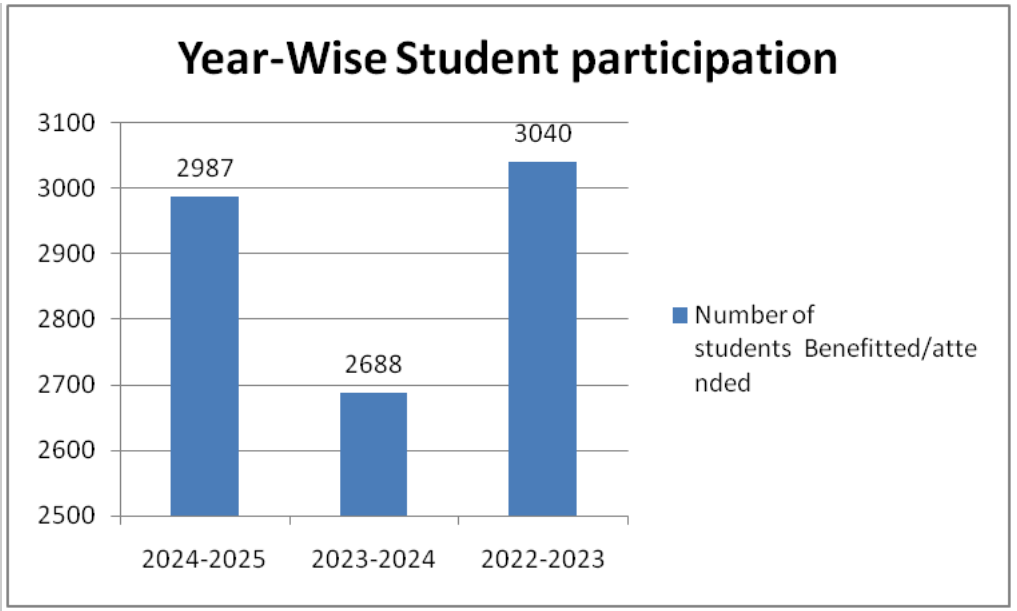

The NSS unit of ANRK actively organized a wide range of community-oriented programs focusing on health, social awareness, education, environment, civic responsibility, and cultural development. Major initiatives included International Yoga Day celebrations, free medical and eye check-up camps, blood donation drives for Thalassemia children, cancer awareness programs, and menstrual health awareness sessions for women and girls to promote preventive healthcare.

The unit also conducted anti-drug campaigns, road safety awareness programs, Swachhata initiatives, plantation drives, and rural survey camps to encourage social responsibility and environmental protection. Educational support activities such as distribution of chalk-boards in government schools, online educational services, and assistance during examinations strengthened rural education and community engagement.

Civic awareness was enhanced through Voters Awareness Rallies, Electoral Literacy Club activities, Youth Parliament participation, and Constitutional Day celebrations, fostering democratic values among students. Cultural celebrations like Bathukamma and Sankranti promoted tradition and social harmony.

Overall, the NSS activities at Anurag Engineering College significantly contributed to community welfare and nation-building while shaping students into responsible, service-oriented, and socially committed citizens.

Annexure I

(A) PROGRAM OUTCOME (POs)

Engineering Graduates will be able to:

PO1: Engineering Knowledge: Apply knowledge of mathematics, natural science,computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

PO2: Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

PO3: Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

PO4: Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

PO6: The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences

PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

(B) PROGRAM SPECIFIC OUTCOME (PSOs)
Program should specify 2-4 program specific outcomes.

PSO1	Apply mathematical abstraction, algorithms, and data structures to solve complex computing problems using multiple programming paradigms.
PSO2	Design, develop, and deploy software systems and computing solutions for multidisciplinary domains using software engineering practices, modern development tools, and project management skills, with due consideration to societal needs, professional ethics, and sustainability, enabling success in professional careers, entrepreneurship, and higher studies.Design software solutions for multidisciplinary domains using software engineering principles, modern tools, project management, professional ethics, societal responsiveness, and sustainability—enabling career, startup, and higher studies success.

Declaration

The head of the institution needs to make a declaration as per the format given -

- I undertake that, the institution is well aware about the provisions in the NBA's accreditation manual concerned for this application, rules, regulations, notifications and NBA expert visit guidelines inforce as on date and the institutes hall fully abide by them.
- It is submitted that information provided in this Self Assessment Report is factually correct.
- I understand and agree that an appropriate disciplinary action against the Institute willbe initiated by the NBA. In case, any false statement/information is observed during pre-visit, visit, postvisit and subsequent to grant of accreditation.

Head of the Institute

Name : Dr. Suresh Kumar Tummala

Designation : PRINCIPAL

Signature :

Seal of The Institution :

Place : KODAD

Date : 23-03-2026 16:57:40
