9.2 Mentoring system (5)

Institute Marks : 5.00

Mentoring System

In an educational institution, a well-structured mentoring system is essential for the holistic development of students. The primary goal of such a system is to provide personalized support, guidance, and resources to students, enabling them to overcome academic and personal challenges. This, in turn, helps them to achieve their potential both academically and in their professional lives. All faculty members in our department as well as in our institute actively serve as mentors, providing guidance and support to students and foster a strong and positive student-teacher relationship throughout the students' academic journey.

Features of the Mentoring System

Assignment of Faculty Mentors: In our department, each student is assigned a faculty mentor at the beginning of the academic term. Acting as advisors, they provide guidance on academic paths, personal development, and career planning. Each faculty member mentors 14 to 16 students, depending on the student-teacher ratio.

Regular Interaction and Progress Monitoring: Mentors hold regular sessions with students, creating a consistent communication channel for guidance and support. These meetings help track academic performance, address learning challenges, and provide constructive feedback. At least 3 - 4 meetings are arranged by mentors for their mentee in each semester. In isolated cases, parents are called for counseling and their special meeting with the HOD at the suggestion of the mentor.

Personal and Professional Development: The mentoring system aims to foster both personal growth and professional skills. Mentors often encourage students to participate in extracurricular activities, workshops, and seminars to enhance soft skills and technical knowledge. Additionally, career guidance is provided to help students plan for internships, higher studies, or job placements.

Assistance during Challenges: Mentors provide critical support for students facing academic, emotional, or personal challenges. They help connect students with appropriate resources, such as counseling services, peer study groups, or tutoring. Together with the student, they develop strategies to address these challenges, fostering resilience and confidence.

This continuous mentoring spans all 8 semesters of the B. Tech program, ensuring that each student receives guidance tailored to their specific needs and aspirations.

Focus Areas of Mentoring:

1. Academic Progress:

- Regular mentoring after internal assessments and semester exams (CA1–CA4 and End-Sem).
- High achievers are encouraged to aim for university ranks and offered leadership in peer mentoring.
- Slow learners are identified and supported through remedial classes, peer-learning, and subject-specific coaching.
- Recognition through scholarships, certificates, and awards for toppers and meritorious students.

2. Co-curricular Progress:

- Students are guided to participate in technical workshops, inter-departmental projects, seminars, symposiums, value-added courses, and competitions.
- Faculty mentors suggest suitable events and track participation.

3. Extra-curricular Progress:

- Students are motivated to join clubs, NSS and participate in activities such as sports, arts, music, drama, and photography.
- Students engage in social responsibility initiatives such as tree plantations, cleanliness drives, blood donation camps, and NGO activities.
- These engagements develop personality, teamwork, and confidence.

Effectiveness and Outcomes of the Mentoring System:

Academic Enhancement:

- Significant improvement in academic performance and test scores
- Reduced failure rates and increased university rank holders

Improved Attendance and Discipline:

- A noticeable increase in attendance percentage and classroom discipline
- Students are more accountable due to continuous mentor monitoring

Holistic Development:

- Better engagement in co-curricular and extracurricular activities
- Stronger personal values and civic sense due to social initiatives

Career Readiness:

- Improved placement outcomes and higher education admissions
- Many students have cleared competitive exams and started their own ventures

Positive Student-Teacher Bond:

- Enhanced trust and communication between students and mentors
- Mentors are approachable, and students are comfortable sharing concerns

Parental Involvement:

- Regular updates and meetings help keep parents informed and involved in their ward's progress

Mentoring Book:

- After collecting all necessary information, such as mobile number, email address, guardians contact number, etc., mentors maintain and update the Mentoring Book following regular sessions with students. A sample of the Mentoring Book is provided below.
- Overall, the mentoring system has proven effective in supporting students academic, personal, and professional growth, fostering a positive and nurturing environment that aligns with the institution's goals.
